GRAND AVE. AT GLADSTONE • GLENDORA, CALIF.

(1 Mile South of Highway 66 on Grand Ave.)

ORCHIDS OF QUALITY AND DISTINCTION

WE TAKE GREAT PLEASURE in presenting this new offering of select Cymbidium hybrids. Our stock of fine stud plants is most extensive and includes the finest proven and prize winning varieties which have been developed thus far. The crosses listed here are the result of long range planning and observation, with plant vigor, and free flowering characteristics as well as high flower quality being carefully considered. This is without doubt the finest group of young plants we have ever offered, and we are confident that the high quality and proven worth of the fine parents will assure optimum results.

With the rapidly growing demand for high quality GREEN CYMBID-IUMS, this list offers unusual opportunity to acquire a well rounded and distinguished selection in this exceptionally beautiful color section.

You may order by mail or make your selection at the Nursery — we are open every day including Sunday.

All of the plants listed in this offering are sturdy pot grown plants healthy and well rooted.

The prize winners of tomorrow will come from the fine seedlings of today.

UNFLOWERED CYNBIDIUM SEEDLINGS

Cross No. (E) L15 BUTTERFLY X TRACYANUM The purpose here was to obtain an early flowering hybrid average, and exceptionally strong flowering. L19 CAVALIER (ADELMA Var. GOLDCREST X SICILY FINE) A beautiful golden yellow, every free flowering, combined with a large heavy green. MATURE PLANTS AND PROPAGATIONS

Our stock of top quality Cymbidiums is well known to those who have visited the Nursery, and many fine exhibition and stud varieties are available for the discriminating Orchid fancier, and for the hybridizer. Among these are varieties which have won the highest awards wherever fine orchids have been exhibited, and whose progeny are setting new standards and winning new honors today.

Many of these world famous plants can be seen in bloom during the flowering season and you are cordially invited to visit the Nursery when in our vicinity.

Because of the great number of varieties which would have to be included, we do not publish a catalog or listing of our mature plants and propagations, but invite your inquiry for specific varieties or types, either for exhibition or stud varieties. We will also be glad to suggest individual plants or groups in any requested price range.

ORCHID BOOKS

Interesting, informative, and beautifully illustrated — a welcome addition to the library of the novice or the professional orchid grower — an ideal gift.

ABC OF ORCHID GROWING — by John V. Watkins Revised edition — illustrated. A good introduction for the beginner or amateur	\$3.00	
ORCHIDS AND HOW TO GROW THEM — by Adelaide C. Willoughby Concise, illustrated and up to date. The basic fundamentals — and more. Interesting and well written	4.00	
AMERICAN ORCHID CULTURE — by Edward A. White Third edition. Revised and enlarged.— A handbook for Orchid growers, both commercial and amateur. 14 excellent color plates plus many black and white	6.00	
HOME ORCHID GROWING — by Rebecca Northern A very interesting and well written book—highly recommended—Beautifully illustrated with 11 full color plates, 22 line drawings and diagrams and 112 black and white half-tones.	6.50	
ORCHIDS ARE EASY TO GROW — by Logan & Casper
